## VISION

**Creation of an economically and socially sustainable tea small holdings community**

## MISSION

Increasing productivity and quality of tea smallholdings sector through provision of excellent support services

**Tea Small Holdings Development Authority**  
**Annual Report 2011**  
**Chairman's Review**

I am glad of the opportunity of issuing a message for the Annual Report for the year 2011 of the Holdings Development Authority which was established in 1977 as a service organization for the tea smallholders. Mission of our organization is to provide support services to increase productivity and leaf quality of tea lands of the tea smallholders.

70% of the national production of the tea industry which is the leading enterprise in the plantation sector in the national economy is borne by the tea smallholdings sector. 229.01 million kilos was produced by the tea small holdings sector out of the national tea production of 327.53 million kilos in the year 2011.

Under the increasing production cost conditions of the tea small holdings sector, fertilizer use was a factor bearing around 20% of the total cost so far. The possibility of reducing that cost down to around 11% through the fertilizer subsidy implemented by the government from 2008 should be specially mentioned.

Programmes have been implemented by our organization from 2010 with the long term objective of improving livelihood of the tea smallholders based on main activities of increasing unit productivity of tea smallholdings and improving leaf quality to increasing production margin aiming at high market prices.

Incentive payments were provided to replant 772 Ha of tea during 2011 by the organization. This a considerable reduction of the extent cultivated through incentives in comparison to the previous year. Though tea export earnings had increased in comparison to the previous year, prices received for green leaf had declined.

It would be necessary to proceed with special attention to methods of increasing technical efficiency to overcome challenges of the tea smallholdings sector in the face of various limiting factors.

**Noel Padmasiri Kariyawasam**  
Chairman

## Performance indicators of Tea Small Holdings Sector – 2011

	<b>2009</b>	<b>2010</b>	<b>2011</b>
1 Extent of Tea Small Holdings (Hectares)	120,009	120,324	120,664
2 Number of Tea Small Holders	387,110	388,645	389,561
3 Production of Tea Small Holdings (Million Kilos)	201.9	230.1	229.0
4 Share of contribution to National Production	69.3	69.4	69.9
5 Productivity (Kg Made Tea/Hectare)	1,733	1,976	1,966
6 Replanting extent Hectares (Under Incentive Payments)	777	847	772
7 New planting extent Hectares (Under Incentive Payments)			28
8 Replanting Rate	0.70	0.73	0.66
9 Crop Rehabilitation – Number of Plants (Million)	0.431	0.424	0.504
10 Fertilizer Issue on Credit Scheme (Mt)	969	-	-
11 Tea Small Holder Development Societies			
No. of Societies	1,353	1,372	1,379
No. of Members	263,016	282,502	274,161
12 Extension & Advisory Services			
Individual Visits	37,268	27,346	26,103
Group Programmes	9,170	7,154	6,970
Farmer Participation	338,415	210,334	175,849
13 Operational Expenditure of the Organization (per 1 Rupee of Development Cost)	1.08	1.08	1.04
14 Tea Inspector/Extension Officer: Small Holder Ratio	1:2633	1:2643	1:2650
15 Price of a Kilo of Green Leaf Rs.	52.71	54.11	52.63

## **Executive Summary**

### **Extent of Tea Smallholdings**

Total tea land extent excluding abandoned tea lands according to census of 2005 is 125019 Hectares.(Including lands below 20 perches) According to data for the last decade, an extent of about 1082 hectares is being uprooted for replanting and around 875 hectare is being replanted annually with subsidy from the organization. On the trend for past three years, 962 hectares is being uprooted and about 799 hectares is being replanted annually. In addition to replanting under subsidy, farmers are taking action to replanting without subsidy and also new planting annually. Also, attractive market prices for tea, orientation towards alternate crops and intercropping in tea, special projects implemented for low income farmers is taking place and this trend could be observed fluctuating annually, depending on favourable and unfavourable results over time. Based on information gathered by Tea Inspector / Extension Officer range level under the Cost Estimate Survey in 2011, 916 farmers have entered tea cultivation whilst extent added was 340 hectares. Based on the analysis, highest extent i.e about 128 Ha entering through tea new planting is from Ratnapura District. Thus, total estimated total extent of tea smallholdings by the end of 2011 is 120,664 hectares.

### **Production of the Tea Small Holdings Sector and Contribution to National Production**

It had been possible to increase the production of the tea small holdings sector from 183 to 230 million kilos during the lapsed decade. Contribution to national production also had grown from 60% to 70%. However, in comparison to 2010, production of tea smallholdings had decreased by 1.11 million Kg or 0.48%.

### **Productivity in the Tea Smallholdings Sector**

In view of the favourable weather conditions and existence of satisfactory levels of fertilizer use under the national fertilizer subsidy scheme, average annual productivity of tea smallholdings sector in 2010 was 1976 Kg made tea per hectare and productivity in 2011 was 1966 . Though low country and up country production of the tea smallholdings sector had grown in comparison to year 2010, mid country production had declined marginally. Also, mid country average productivity in 2010 was 1474 and it had declined to 1375 in 2011. But low country average productivity in 2010 had been 2083 and it had increased to 2093 in 2011.

## **Extent of Tea Replanting and Replanting Rate**

In conformity to national policy, 2% of the existing tea extent has to be annually replanted in order to maintain the tea extent obtaining the maximum yield. Mature tea extent in the tea smallholdings sector by 2010 as per the census data is 116,492 hectares. Also, 21,613 hectares are lands which have already exceeded 25 years. There is a necessity of directing these lands to replanting expeditiously. In view of budgeted physical targets in previous years being revised 772 hectares were replanted in 2011. Thus the tea replanting rate had declined to a low value of 0.66%. However 2300 hectares need to be replanted annually according to the national requirement.

## **Crop Rehabilitation**

Incentives are paid on this cultivation scheme based on pruning as recommended, establishment of soil conservation measures, management of shade along with supplying plants in vacancies in an integrated manner. Applications and issue of permits had increased by 32% and 76% respectively in comparison to the previous year. The number of plants established is 0.504 million. This is a 19% increase in comparison to year 2010. Though the targeted number of plants under crop rehabilitation in 2011 was 1.3 million, the organization had to limit it to 0.29 million plants in view of the limited funding.

## **Extension and Advisory Services**

The number of group extension conducted under extension and advisory services in 2011 by all regional offices is 8970. This is a comparative reduction of 2.5%. Number of targeted programmes in 2011 was 9094 and the progress was 77%. Farmer participation in 2011 is 175,849. Targeted number is 190,216. Thus the progress on the targeted number of farmers is 92%. 18,276 soil samples were tested for soil acidity in 2011 and this is a 78% against the targeted number of samples.

## **Tea Small Holder Development Societies**

Tea Small Holder Development societies initiated in the year 1989 is a society system which had been legislated. 1379 societies had been registered by the year 2011 under this society system which consists of 8 regional organizations and an all island federation. Total membership is 274,161. A 0.5% growth in the number of societies and a growth of 2.9% in the membership could be observed in 2011 in comparison to year 2010. Implementation of national fertilizer subsidy scheme through societies is a strong reason for the development in the society system and society system established by the organization was an easy avenue to implement this programme

### **Operational Costs of the Organization**

Development cost of the organization in 2011 is Rs. 208.407 million. Operational cost is Rs. 218.527 million. In comparison to year 2010, development cost had increased by Rs.0.019 million according to financial provisions. Operational cost had increased by Rs.0.013 million. Ratio between operational cost and development cost was 1.04. In comparison to last year, operational cost had decreased by 0.04.

### **Tea Small Holder to Tea Inspector/Extension Officer Ratio**

Though the extension officer to farmer ratio should be 1:1000 for an effective extension service, this ratio in the small holdings sector is 1:2650. Accordingly, though it is necessary to increase the number of officers to improve the ratio, it is not possible to do so in view of the cost and funding limitations of the organization and obtaining the assistance of support services such as of Smallholder Development Societies instead is done by the organization. However, to further improve the productivity of tea lands, it is necessary to increase the intensity of agricultural extension activities.

### **Prices of Green Leaf**

The average price received for a kilo of green leaf based on the market prices for Sri Lankan tea in 2011 by tea small holders was Rs.49.76 for up country, Rs.46.76 for mid country and Rs.55.76 for low country whilst average for all areas was Rs.52.63. Based on the average for all areas, production margin of tea small holders was positive.

## **Tea Small Holdings Development Authority Annual Report – 2011**

### **1. Introduction**

#### **1.1. Organization and Functions**

Tea Small Holdings Development Authority was established on 1<sup>st</sup> February 1977, under the Tea Small Holdings Development Act No. 35 of 1975.

Act No. 36 of 1991 to legally establish and register the Tea Small Holder Societies, Act No. 21 of 1997 to establish legal status of societies have been legislated.

Also, Act No.34 of 2003 had been legislated adding revisions to original act to increase the composition of the board of directors.

#### **Objectives:**

Development of tea small holdings, increase of production, marketing activities, improvement of productivity and working for the welfare of the tea small holders are the objectives of the organization.

Tea lands under 10 acres are considered “Tea Small Holdings” as per the Tea Control Act. Even though, the organization so far performed support services relevant to develop all private owned tea lands up to 50 acres under the provisions of the Land Reform Act too, treating them as tea small holdings. However, the ministry had instructed in 2011 to withdraw from providing subsidy and other services until lands between 10 and 50 acres and their owners are brought under the purview of the organization at the time when Tea Small Holdings Development Act is revised.

#### **Functions of the Authority**

1. to promote or to undertake development of tea small holdings or other holdings which do not possess their own means of manufacture;
2. to acquire or to develop tea factories and other facilities required for the manufacture of produce of such tea lands;
3. to promote or to undertake marketing of the produce of such factories or of such tea lands;
4. to take all such steps as may be necessary to provide, or to facilitate or to procure, or to facilitate the provision of or procuring of such facilities and services as may be necessary for the development of such tea lands and for the well being of those who are engaged in the production or the processing of the produce of such lands.

Necessary action is being taken to remove the function No.2 from the act and revise functions No.3 & 4 noted above.

In addition, Authority continued to carry out the under noted other functions as well as functions delegated periodically by the Sri Lanka Tea Board, since 1<sup>st</sup> January 1978.

1. Implementation of following incentive schemes for the development of lands under private management.
  - i. Tea Replanting
  - ii. Tea New Planting
  - iii. Infilling
  - iv. Cultivation of Rubber with tea
  - v. Cultivation of Coconut with tea
2. Provision of support services such as distribution of fertilizer, planting material, implements and transport facilities.
3. Implementation of extension and advisory services.
4. Implementation of price supervision activities of tea factories processing leaf of tea small holders.
5. Establishment of society leaf collecting centers
6. Registration of Tea Small Holder Development Societies and establishing regulations of their functions with the intention of expanding support services of the Authority.
7. Registration of tea lands and tea land owners

The advisory board of the Ministry of Plantation Industries had decided that programme of registration of tea lands and owners thereof by the Tea Commissioner's Division of the Sri Lanka Tea Board under the Tea Control Act No.51 of 1957 until about year 1990 be implemented by the Tea Small Holdings Development Authority. Accordingly, the organization has to take action to register tea smallholders as per the classification in the Tea Control Act. Thus it was expected to delegate powers under the Tea Control Act to the Te Small Holdings Development Authority.

## **1.2. Review of Audit & Management Committee meetings**

Basically the undernoted areas were subject to the review off the committee.

1. Reviewing annual audit plan and approval
2. Reviewing matters elicited by internal audit reports and expediting implementation of recommendations.
3. Reviewing Auditor General's reports and taking corrective action to prevent reoccurrence of deficiencies thereto.
4. Review of progress on replying audit queries.
5. Review of annual budgets, internal financial statements and evaluation of achieving of targets on performance.
6. Ensuring final accounts and annual reports are submitted in time.
7. Reviewing and making decisions on administration and development of human and other resources.
8. Reviewing staff disciplinary matters and directing towards institutional thrift.

### **1.3 Administrative Matters**

#### **1.2.1. Organization Structure and Scheme of Recruitment**

The new organization structure which was prepared by the authority and submitted to the Management Services Department with the recommendations of the line ministry was recommended by the Salaries and Cadre commission and approved by the by No. DMS/E4/08/070/1 dated 31.01.2011. Organization took steps to absorb all employees on the approved organization structure and the cadre.

#### **Appointments made during the year**

Following appointments were made during the year after calling for applications as advised by the Ministry of Plantation Industries and approval of the Department of Management Services to fill the vacancies of the Authority.

<b>Position</b>	<b>Grade</b>	<b>Number</b>
Deputy General Manger (Development)	HM 1-1	01
Management Assistant (Technical)	MA 2-2 III	08
Officer In Charge	JM 1-1 II	26

### **1.3.2.Results Based Management**

The organization started operating through Results Based Management from 2010 onwards to achieve aspirations of the tea small holdings sector by targeted results according to the corporate plan prepared to perform institutional statutory objectives. Thus the organization worked to achieve the long term development result of improving the livelihood of the te smallholder and undernoted medium term results as per the Acton Plan 2011 in the year 2011 as well.

### **Development Results**

**Long Term Impact** - Enhancement of living standards of tea small holders.

### **Medium Term Results**

1. Increase the yield to Kg made tea / hectare / annum in 06 years to  
2700 in low country  
1700 in mid country  
1500 in Uva
2. Improve leaf standard to 75% at factory level in 5 years.
3. Strengthen 50% of the community based organizations within 06 years
4. Strengthen the organization to function more effectively within a year
5. Direct 10% of the lands towards additional income earning activities within 05 years

### **1.3.3 Policy Decisions**

- (i) It was decided to increase the incentive payment to motivate farmers for replanting in view of the incentive payment granted for replanting being reduced to 12% of the total cost that should be borne for replanting which had increased due to increase of input prices. Accordingly, it was approved by budget proposals to increase the subsidy rate by Rs.50,000/= per hectare from 01.01.2012.
- (ii) Tea new planting was permitted when there is no alternate crops or income avenues and the subsidy paid for this was increased to Rss.150,000/= from Rs.50,000/= through the budget proposals.

## 2. Tea Small Holdings Sector in Sri Lanka

### 2.1. Tea Small Holdings

Though lands less than 10 acres in extent are treated as “tea small holdings” according to the Tea Control Act, the organization had provided support services for development of lands up to 50 acres under private management considering them as small holdings under the provisions of the Land Reform Act.

### 2.2. Land Extent of Tea Small Holdings

With the extent of tea small holdings of 132,329 Hectares (including extents under 20 perches), as per the Census of Tea Small Holdings in 2005, total tea extent in Sri Lanka will approximately be 221,968 Hectares. Thus, 59% of the total tea extent in Sri Lanka belongs to the tea smallholdings sector. When compared with details of census of small holdings in 1994/95, tea extent in Sri Lanka had increased from 82,919 to 116,492 Hectares (only lands above 20 perches), i.e. 40% within a decade.

Total extent of tea small holdings is 132,329 Hectares. (including lands below 20 perches in extent). 7,310 hectares is abandoned tea lands. Out of the balance extent, 118,275 Hectares is mature and immature tea. Total mature and immature tea extent excluding lands under 20 perches is 116,492 hectares. An extent of 315 Ha had been newly added in 2010 to the tea extent as per the TI/EO range baseline survey - 2010. Including the extent of 340 ha newly planted in 2011, total estimated extent is 120.664 ha.

**Figure No. 1**  
**Contribution of Tea Small Holdings to the Total Tea Extent**

Source:

\* Census Report of Tea Lands in Sri Lanka 1994/ 1995, Sri Lanka Tea Board

### 2.3. Tea Small Holders

The number of tea small holders by the year 2005 is 370,842 (including cultivators of less than 20 perches). 82% out of this are smallholders with single ownership and they own about 76% of the land extent. According to TI/EO range baseline data estimates, 916 farmers have newly entered tea cultivation in 2011.

### 2.4. Number of Small Holdings

The total number of tea small holdings had increased from 206,652 to 350,982 (lands above 20 perches), i.e. 70% within the period from 1994 to 2005. Out of the number of tea smallholdings in Sri Lanka, 11.6% is less than 20 perches in extent and these cover 1.5% of the total tea area. 75% of tea small holdings are lands less than 1 acre in extent whilst 95% belongs to the category of less than 2 acres. Percentage of lands above 10 acres is very small at 0.78%.

The number of parcels and distribution of extent according to the census of 2005 is as follows.

**Table No. 1**  
**Number of Tea Lands According to District in Sri Lanka – 2005**

District	No. of Small Holdings	Hectares	No of Lands/As per extent Ha						
			<1/2 Less than	1/2 - < 1	1 - < 2	2 - < 3	3 - < 5	5 - < 10	>10

\* Source – Census of Tea Lands in Sri Lanka - 2005

Price escalation of green leaf, increase of incentive payments for tea cultivation, fragmentation of large holdings and cultivation of lands without alternate crops with tea have specially influenced the growth of lands in the tea small holdings sector.

## 2.5. Land Classification

\*Out of total extent of tea small holdings, 113,190 acres (34.6%) are lands less than one acre in extent whilst 198,707 acres (60.8%) are lands less than two acres in extent. Extent more than ten acres is 59,731 acres (18.3%)

**Table No. 2**  
**Extent of Tea Small Holdings in Sri Lanka and Classification According to Number of Parcels**

Acres	Land Extent	%	No. of Parcels	Percentage
	Acres			%
Less than 1	113,190	34.6	297,342	75

## 2.6. Production in Tea Small Holdings Sector

Tea small holding sector is leading the national tea production in Sri Lanka from year 1991. Tea smallholding sector which held a 50% share of national tea production in 1991 had been able to increase the production capacity to a share of 70% by the year 2011. (Schedule No. 04)

The highest national annual tea production i.e 331.42 mil kilos is recorded in year 2010. The national tea production in 2011 is 327.53 million kilos. Production had declined by 1.17% in comparison to year 2010.

However, production in the small holdings sector had declined to 229.01 million kg i.e 0.48%. Contribution by the tea smallholdings sector to national production in 2010 was 69.44% whilst in 2011 it is 69.92%.

**Table No 3**  
**Total Tea Production in Sri Lanka – 2009 / 2011**  
**Contribution According to Type of Management**

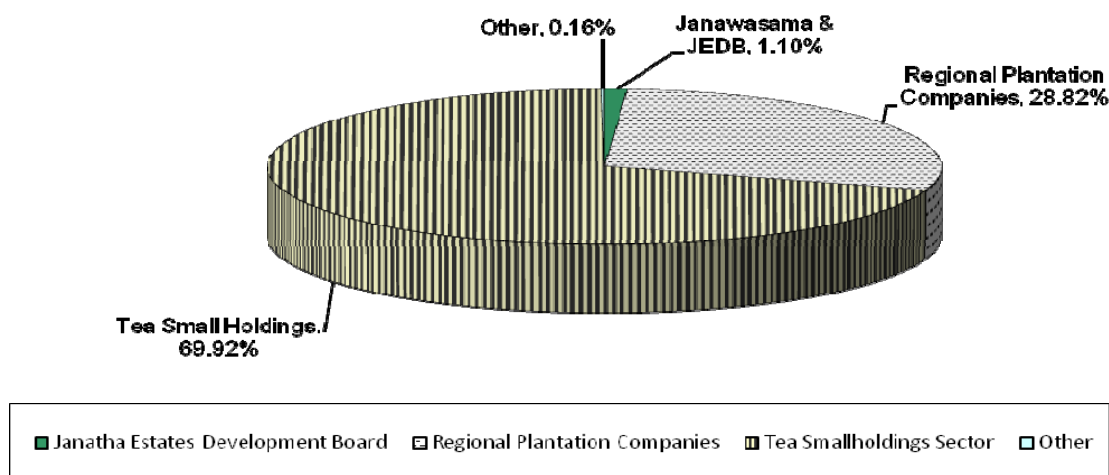

Management Institutions	Tea Production (Metric Tons)			
	2011	%	2010	%
01 Tea Small Holdings Sector	229,016	69.22	230,136	69.44

Source:- Sri Lanka Tea Board

(All bought leaf had been included in the production in the small holdings sector according to classification of institutions. Private sector had been considered as small holdings sector in this)

**Figure 02**  
**Percentage Production Share of Management Institutions - Year 2010**

Favourable weather conditions throughout the year of 2011 except for the months of February and March and high level of fertilizer use under the national fertilizer subsidy scheme had influenced the increase in national annual tea production in the tea smallholdings sector.

Contribution to production by tea smallholdings sector had gradually increased by the year 2000 from 60% to 70%. Contribution to production in 2010 had been 69.44% and contribution in 2011 is 69.92%.

Figure 03

Tea Production in the Tea Smallholdings Sector (Annually/Monthly) -Million Kg  
2010 / 2011

**2.7. Production Composition of Tea Small Holdings**

95% of the low country production, 56% of the mid country total production and 18% of the up country total production out of national production for 2011 comprised of production by the tea smallholdings sector (Refer table 04). Also, 81% out of production in the private sector belonged to the low country production.

**Table No 04**

## 2.8. Productivity in the Tea Small Holdings Sector

The main contributory factor for the increase in national tea production in two years of 2010 and 2011 was the growth of production and productivity of the tea smallholdings sector.

According to revised production data of the Sri Lanka Tea Board, average productivity of the tea small holdings sector in 2010 is 1,976 made tea Kilos per hectare. Average productivity in the tea small holdings sector in the year 2011 is 1966 kg of made tea..

**Table No.05**  
**Productivity in the Smallholdings Sector 2011 (Made Tea / Kilos)**  
**On Administrative Districts Basis**

## 2.9. Investments in tea Small Holdings Sector

Annual investment amounts in the tea smallholdings sector is shown in table No. 06. An amount of Rs.425 million had been allocated from the consolidated fund which consisted of Rs.200 million as development and institutional capital and Rs.225 million as recurrent cost in the year 2011. A total amount of Rs.391.594 was received by the organization for the year which comprised of Rs.190.472 million of development and institutional capital and recurrent cost of Rs.201.122 million. The major part of this money had been invested on replanting. Development of infrastructure facilities of the organization had not been possible in view of the limitation of funds received for capital expenditure.

## Operational Review

Aa risk of operational costs increasing in the long run could be observed in view of provisions for institutional capital, maintenance of resources and human resource development being limited.

**Table No. 7**  
**Operational Review (From 1995 to 2011)**

<b>Year</b>	<b>Development Cost Rs.'000</b>	<b>Operational Cost Rs.'000</b>	<b>Operational Cost per Rupee of Development Cost</b>
1995	79821	59150	0.74
1996	52665	58095	1.10
1997	63379	70547	1.11
1998	101191	127080	1.26
1999	153503	116822	0.76

2009	185660	202197	1.08
2010	189194	205385	1.08
2011	208407	218527	1.04

\*\* Operational Cost had been calculated including project cost up to year 2002.

+ Operational cost had been calculated on accrual basis.

### 3. Statutory Objectives and Results Based Development Functions

The development functions affiliated to the statutory objectives of the organization are as follows.

01. to promote or to undertake development of tea small holdings or other holdings which do not possess their own means of manufacture

Following development activities have been implemented for the tea smallholders with the intention of performing this statutory objective.

01. Tea replanting incentive scheme
02. Te new planting incentive scheme
03. Crop rehabilitation incentive scheme
04. Cultivation of tea with rubber
05. Cultivation of tea with coconut

02. to acquire or to develop tea factories and other facilities required for the manufacture of produce of such tea lands

“Tea Shakthi Fund” had been established by the authority in 1997 under this objective and relevant activities are performed by that from year 2000 as a separate institution for the above objective.

03. to promote or to undertake marketing of the produce of such factories or of such tea lands

For this statutory objective

- Increasing quality of green leaf of factories to which smallholders supply leaf
- Conducting price supervision activities of factories processing smallholder leaf

04. to take all such steps as may be necessary to provide, or to facilitate or to procure, or to facilitate the provision of or procuring of such facilities and services as may be necessary for the development of such tea lands and for the well being of those who are engaged in the production or the processing of the produce of such lands.

Under this;

01. Distributing tea fertilizer, provision of support services such as providing planting material, utensils and transport facilities
02. Implementing extension and advisory services
03. Establishing society leaf collecting centers
04. Taking steps for the welfare of the people engaged in converting produce of tea small holdings and registering of tea small holder development societies with the objective of accepting them as legal organizations and creating regulations on their activities
05. Strengthening tea small holder development societies as community based organizations and directing smallholders to additional income earning activities

The organization worked towards the following medium term development results to achieve relevant development functions and results expected thereof to perform statutory objectives through the above functions in 2011 too.

01. Increase productivity in 06 years to Made tea/hectare/annum

Low Country	2700
Mid Country	1700
Uva	1300

02. Improving leaf quality to 75% at the factory level in 5 years

03. Strengthening 50% of the community based organizations in 06 years

04. Strengthen the organization within one year to function more effectively

05. Directing 10% of the lands towards additional income earning activities within 05 years.

### **Action Plan and Practical Difficulties**

The expected provision to implement institutional strategies in the annual plan for year 2011 to achieve expected development results under the new approach was Rs 289.79 million. Even though the organization had to plan development activities to match the provision of Rs.182.24 million according to funds provided for the organization for development activities. Thus, since it was advised to render priority to continuation activities in allocating funds for tea replanting in 2011 to the targeted extent of uprooting under replanting had to be limited to 399 hectares. Similarly, estimates were framed reducing extents under first installment of soil rehabilitation to 740 ha from 1180 ha, II installment of soil rehabilitation from 967 ha to 824 ha and replanting from 954 to 837 ha.

Even though 399 ha was included in the estimates according to provision of funds, it was planned to complete uprooting on 1271 ha with the intention of continuing the trend for replanting in the tea smallholdings sector. Thus, the organization completed 947 ha or 75% of the targeted extent in 2011 under uprooting expecting additional funds.

Though the organization planned for the socio-economic survey during 2011 too to ascertain whether expected targets are being achieved in realizing development results, the organization was unable to render priority to this under limitation of funds.

## Results Based Medium Term Targets and Achievements

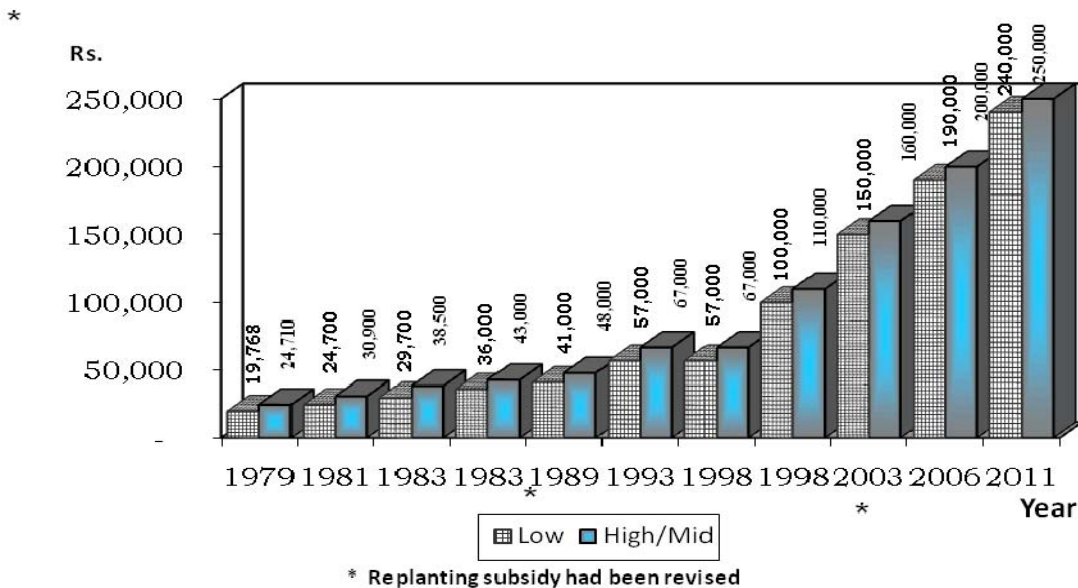

### 3.1 Medium Term Results – 01

**Increasing productivity in 06 years to 2700 Kg in low country, 1700 Kg in mid country and 1500 Kg in Uva, made tea/Ha/annum.**

#### 3.1.1 Maintaining tea replanting rate at 2% annually.

It is expected to motivate cultivation of approved vegetative propagated tea in low yielding old seedling tea fields to increase productivity and production of tea smallholdings under this incentive. Incentives were paid for a maximum extent of 1 Ha, at the rate of Rs. 250,000/- per Ha in High/Mid elevations and Rs.240,000/- in the low elevation. Since it was not sufficient to cover only 12% of the total cultivation cost under cost conditions of replanting through incentive payments, a policy decision was taken to increase the relevant incentive amount.

**Figure Mo. 05**  
**Increase of Subsidy for Replanting**  
**From 1979**

#### Application for Replanting

Though it was targeted to obtain applications from 11365 farmers for replanting under the action plan for 2011, 10321 farmers had applied for replanting. The extent expected to be uprooted under this was 2263 Ha. Out of this, 9180 farmers were issued with permits in the year 2011.

**Figure No – 06**  
**Applications for Cultivation Subsidies 2000 – 2011**

Applying for replanting subsidy scheme had increased by 20% (Table No. 08) in comparison to previous year. Progress on uprooting had declined by 7% in comparison to previous year since uprooting was completed on 947 ha according to the action plan though the extent defined to be uprooted according to the budget provision was 399 ha. However, annual targeted extent had been completed. Soil rehabilitation I stage by 15%, II stage by 6% and tea replanting 9% declined in comparison to the previous year.

The organization had paid Rs.187.642 million for tea replanting during the year. This had increased by 4.8% (On account of increase in subsidy) in comparison to the previous year. A sum of Rs.194.54 million had been spent for tea replanting including Rs.3.49 million for providing agricultural implements to farmers and Rs.3.41 million as interest subsidy paid to farmers who replanted tea under the Tea Development Project revolving fund loan scheme.

Under the package of providing input material to permit holders to prepare nurseries under the basis of deducting from the subsidy for replanting, following material had been provided and the amount spent is Rs.4.67 million.

<u>Material</u>	<u>Quantity</u>	<u>Material</u>	<u>Quantity</u>
Tea Plants	67567	T-65 Fertilizer Kg	1148
Shoots of new cultivars	77661	Tea cultivation hand books	214

### **3.2.1 Crop Rehabilitation Subsidy Scheme**

Incentive payments are made under the crop rehabilitation subsidy scheme with the objective of increasing unit productivity in v.p tea lands in plucking for infilling whilst practicing pruning, soil conservation methods (Rehabilitation of drain systems/stone terraces) management of shade and practicing other cultural practices in an integrated manner.

Lands on which tea cultivation could be maintained successfully for another 10 years are recommended for this subsidy scheme and land being in the stage suitable for second pruning or age of tea cultivation exceeding 07 years are eligibility criteria for subsidy.

Under this subsidy scheme incentives are paid in two installments at the rate of Rs.25/- per plant, on the condition that tea cultivation is rehabilitated by infilling in blocks, subject to a maximum of 1,000 plants per acre in up/mid country and 750 plants per acre in low country.

In comparison to the year 2010, applying for subsidy and issue of permits had increased by 32% and 76% respectively. Similarly, annual target also had increased by 79% in relation to the previous year.

Annual targets had to be reduced in view of revision of budgetary estimates and annual progress of number of plants obtaining first installment had increased by 19% in comparison to previous year (Table No. 09).

Number of plants qualifying for the second installment is 43% out of the number of plants receiving first installment in year 2010. Rs.6.329 million had been paid as incentives for crop rehabilitation in 2011. The amount of subsidy paid had increased by 76% in comparison to the previous year.

### 3.2.3 Tea New Planting Subsidy Scheme

Steps have been taken to implement the new planting subsidy scheme again from 2010 which was stopped on a policy decision in 2003. Accordingly, action was taken to implement new planting in 50 Ha under limited funding, in areas where alternate crops or other income avenues are absent. Thus, tea new planting had been completed in 28 ha in two districts of Kegalle and Kalutara. The incentive amount released in 2011 was Rs.1.186 million.

Inclination of farmers towards new planting had declined in view of the inadequacy of subsidy payable so far. It was proposed to increase this subsidy amount to Rs.150,000/- per hectare by the budget proposals in 2011.

**Table No. 10**

## Supply of Quality Tea Plants

### Maintenance of Mother Bush Cultivations of New Improved Tea Cultivars

Provision of quality planting material to tea smallholders to improve tea production and productivity is another important strategy of the organization. Thus, the organization maintained mother bush extents with quality new improved cultivars and took steps to provide shoots to tea smallholders, commercial tea nursery operators and also institutional tea nurseries. Details of issues of shoots of new improved cultivars from mother bush sites are indicated in Annexure 5 A. An amount of Rs.0.778 million had been spent for these activities.

### Commercial Tea Nurseries

It is very important to maintain commercial tea nurseries with quality as nurseries registered with the organization to facilitate availability of quality plants to tea smallholders with the objective of increasing tea production and productivity. Accordingly, 663 commercial tea nurseries were registered by all regional offices as follows and plant capacity of these nurseries was 25.4 million plants.

**Table No – 10**  
**Issue of Permits for Commercial Tea Nurseries and**  
**Plant Capacity (2010 – 2011)**

Area	No. of Permits Issued		Plant Capacity (Millions)	
	2011	2010	2011	2010
Matara	117	102	3.692	3.729
Ratnapura	82	77	4.385	3.733
Kegalle	110	33	5.982	1.308
Kandy	111	88	4.342	3.458
Galle	142	140	3.903	3.983
Nuwaraeliya	-	68	-	4.076
Uva	64	112	1.811	1.932
Kalutara	37	31	1.286	2.060
<b>Total</b>	<b>663</b>	<b>651</b>	<b>25.401</b>	<b>24.279</b>

### Institutional Tea Nurseries

Institutional tea nurseries are maintained with the objectives of producing plants of good quality and controlling market prices when tea small holders buy plants. Thus, 799879 plants were produced by the 06 nurseries maintained in the year 2011. Total number of plants sold was 499487. Sale price of a plant by nursery is indicated on schedule No. 5-B.

#### 3.1.4. Extension and Advisory Training Programmes

Number of planned training programmes in 2011 to provide extension and advisory services to increase tea production and productivity is 6569. Number of programmes conducted was 5275. Thus annual progress based on the target is 80%.. 133485 farmers have participated in those programmes (Table No.-11) as note below. In addition, 18276 samples of soil had been checked for soil acidity (Soil pH) and the progress on targeted tests on this is 78%. Similarly, 30295 individual visits were planned and the progress was 26103. This is a 86% progress on the targeted visits.

**Table – 11**  
**Extension and Advisory Services**

## Medium Term Result – 02

### Increasing leaf quality to 75% at factory level in 5 years

Minimal cost of production and high market prices are prime factors along with high productivity if income levels of smallholders are to be increased. Though it had been possible to reduce cost of production by the ability to procuring fertilizer at low prices through the national fertilizer subsidy scheme, to obtain high prices for green leaf, production of quality green leaf should improve.

To improve the leaf quality, it was expected to improve the use of shears and baskets, training of 10000 pluckers, promote legal provision making acceptance of only good quality leaf by factories compulsory, conducting awareness programmes for leaf suppliers, conducting factory based extension programmes and making smallholders aware of leaf quality were the programmes envisaged to achieve this result. Thus, 1781 training programmes were planned in 2011 to improve quality of leaf and 1488 programmes have been implemented. Progress of this is 82% based on the annual target. Number who participated is 37470 and targeted number of farmers was 55621. Thus, progress on participation is 68%.

In this, to measure whether expected results are being achieved, percentage of good leaf and rejected leaf are being used as two main indicators. Achieving the expected results had become a joint effort by the Authority, Sri Lanka Tea Board, Tea Commissioner's Division and Sri Lanka Tea Research Institute.

A sum of Rs.1.301 was spent in total being Rs.1.115 million for extension and advisory services and Rs. 0.186 million for required training material.

## Medium Term Results - 03

### Strengthening 50% of the Community Based Organizations within 06 years

To make Tea Small Holder Development Society system which was started in latter part of 1989 legal organizations, regulations on tea small holding development societies were declared by gazette extraordinary No 878 /15. This was done under the powers vested by the (O O) paragraph of the 2<sup>nd</sup> sub clause of the 15<sup>th</sup> clause in the act No. 35 of 1975, revised by act No. 36 of 1991 of the National State Assembly.

By the end of the year 2011, 1379 tea small holder development societies were under registration and the membership in those was 274161 as indicated below.

**Table No. 13**  
**Distribution of Tea Small Holder Development Societies**  
**2010/2011**

Regional Area	No. of Societies		No. of Members

Source: TSHDA Progress Reports

In comparison to year 2010, an increase of number of societies by 7 or 0.5% and a reduction of membership by 2.95% can be observed in year 2011. Rs. 3 million was allocated for society development activities and Rs.2.31 had been spent by the organization.

Making suitable legislative changes with regard to activities of tea small holder development societies, effectively improving functioning of 400 societies every three years, changing attitudes of society office bearers, establishing an effective monitoring scheme for societies and establish and implement a revolving fund to develop entrepreneurship in tea small holder development societies were planned to strengthen community based organizations under this.

Objectives of the revolving fund was to establish a soft loan scheme to purchase material required for tea cultivation, transport of produce and provide benefits to societies and the membership of those societies and to manage this fund, act appropriately in recovery of loans, provide benefits to them by continuously reinvesting the fund and creating a strong entrepreneurship through this process.

### All Island Federation of Tea Smallholder Development Societies

This society system consists of 8 district organizations and all island federation. The functions of the all island federation were facilitating work of the regional organizations, continuing tea Shakthi welfare process, intervening in the national fertilizer subsidy scheme when it was functional, assisting in extension programmes in collaboration with the Tea Small Holdings Development Authority to provide a better service to members for primary societies. The all island federation has the opportunity of holding board membership of Tea Small Holdings Development Authority, Sri Lanka Tea Board, Tea Research Institute of Sri Lanka, National Institute of Plantation Management and Tea Shakthi Fund. Also, observer membership of Sri Lanka Tea Council and affiliated membership of Colombo Tea Traders Association is granted.

## **Medium Term Result 04**

### **Strengthening of organization within one year to function more effectively**

#### **Expected short term results**

- 4.1 Maintaining cadre vacancies below 5% within one year
- 4.2 Decentralizing institutional activities to the maximum extent possible within one year
- 4.3 Making approved organizational structure operational by the inception of year 2011
- 4.4 Establishing the Wide Area Network (WAN) within 2 years to link all units of the organization.
- 4.5 Integration of organizational data base with the national information system within 2 years.
- 4.6 All audit opinions being unqualified within 02 years
- 4.7 Introducing and institutionalizing a proper planning process at the beginning of the year
- 4.8 Improving and institutionalizing monitoring system.
- 4.9 Financial, administrative and disciplinary manuals/processes are ready within one year
- 4.11 75% of the staff uses computers for work within 02 years
- 4.13 Positive attitudes exist in organizational staff for official work
- 4.14 A performance based evaluation scheme is available and operational by 2011
- 4.15 Providing professional training for 5% of the staff annually
- 4.16 Staff possesses required knowledge and skills to perform relevant duties

Physical and financial progress, percentage of deviation from budget and number of audit deficiencies have been identified as main performance indicators by the organization under his.

#### **Staff Vacancies**

Action was taken to absorb all staff to relevant positions and recruit personnel to vacant positions as per the approved organizational structure and the scheme of recruitment from 2010.01.31.

#### **Information system and Institutional Data**

Establishment of a Wide Area Network had been identified to link all units of the organization within two years. All expected work was completed by year 2011 and all regional offices started working connected to the centralized database.

Work on development of web site with e-services to link the institutional data base with the national information system was completed and coordination and level of checking for accuracy (60%) was completed in 2011.

Identification of training needs of the all staff on use of computers for office work is completed.

### **Staff Appraisal**

Under the staff appraisal scheme, implementation methodology for performance based evaluation scheme for the field staff was completed with revised proposals and used for evaluating the field staff.

### **Staff Training**

Under human resource training programme leadership/group behavior/ results based management programme (Workshop on “Good Governance through Excellence in Service), workshop on reducing audit problems in state institutions at Sri Lanka Foundation Institute, Workshop on Corporate Planning and Budget at Department of Public Enterprises, Workshop on Management of Transport Services and Stores Management and Supplies Management conducted by Construction Training and Development Authority, Laboratory Training on Technical Matters on Tea Cultivation at Sri Lanka Tea Board were conducted. Two training programmes were conducted at Hantana National Training Center for Tea Inspector/ /Extension Officers under new recruitments. (Schedule No. 11)

Rs.0.928 had been spent in 2011 on human resource training programmes for effective functioning of the organizational activities.

## Medium Term Result 05

### Directing 10% of the lands to additional income earning activities within 05 years

Directing towards additional income earning activities had been identified for improving livelihood of tea small holders. Thus introducing tea based farm management to 1000 smallholdings annually and establishing forestry in 1000 tea smallholdings are short term results identified under this. 610 programme were planned under this during the year and 227 programmes have been implemented. Number of farmers who participated under this is 4894. During the year programmes have been implemented as follows.

## 4. Production Cost and Green Leaf Price in the Tea Small Holdings Sector

### 4.1 Cost of Labour

According to information gathered at field level annually regarding conditions in the tea smallholdings sector, labour scarcity for activities such as plucking, pruning, weed management etc is becoming an acute problem annually. In considering the daily wage rate, it had been revealed that a wage rate exceeding rate stipulated under the Wages Board Ordinance is being paid. Also, instances where disparities in wage levels reported regionally are numerous. Thus, more than the daily wage rate in organized small holder sector had been reported as the price of labour in the unorganized sector in most instances.

Also, it is reported that a higher daily wage is paid where payments to workers are made based on the number of kilos plucked and making extra payments when daily average intake is exceeded, paying of a higher daily wage in comparison to plucking for activities such as pruning which are skilled labour activities.

### 4.2 Production Cost of a Kilo of Green Leaf

Average price and estimated cost of production of a kilo of a green leaf, calculated based on elevation prices received at Colombo auctions according to Sri Lanka Tea Board data (Schedule No 6 -A) is noted below.

**Table -14**  
**Price Received and Production Cost of a Kilo of Green Leaf**  
**1994 – 2011**

Year	Average Price (RS/Kg)	Average Cost of Production (Rs/Kg)
1994	9.80	8.85
1995	11.20	7.37
1996	15.70	8.28
1997	18.04	9.69
1998	20.30	11.24
1999	16.86	16.81
2000	19.82	16.47
2001	21.05	16.64
2002	21.83	17.03
2003	21.79	17.04
2004	26.43	15.15
2005	27.17	20.29
2006	29.18	21.87
2007	40.88	30.64
2008	45.45	36.24
2009	52.71	37.24
2010	54.11	38.56
2011	52.63	44.43

To calculate production cost of a kilo of green leaf in 2011, the average yield per hectare (Low country V.P.Tea) had been considered as 9732 Kg per Ha. (According to production data of Sri Lanka Tea Board) This yield level in 2010 had been estimated at 9686 Kg.

According to calculation based on cumulative prices, average price paid for a kilo of green leaf in 2011 had decreased by Rs.1.48 or 2.7% in comparison to year 2010. Estimated cost of production had increased by about 15%. To minimize escalation of production costs, the national fertilizer subsidy scheme had contributed to a great extents and it had been possible to reduce the percentage cost level of fertilizer by about 11%.

### **Green Leaf Prices and Estimated Cost existent in 2011**

According to Sri Lanka Tea Board data (Schedule No. 6-A), average price realized for all elevations except for up country had decreased in comparison to the previous year. Thus, prices had decreased for low country teas by Rs 12.13 or 3%, mid-country teas by Rs. 11.11 or 3.3%. Prices for up-country teas had increased by Rs.2.45 or 0.7%.

Accordingly, price received for a kilo of green leaf was Rs.49.76 in high elevations, Rs.46.76 in mid elevations, Rs.55.76 in low elevations whilst overall average price for a kilo of green leaf was Rs.52.63. Estimated cost of production per kilo of tea in the low country (Including prices of fertilizer on national fertilizer subsidy) was Rs.44.43.(Refer schedule 6-B, 6-C).

#### **4.3 Production Margin and Price**

Average of production margin based on average productivity of the smallholdings for 2011, average green leaf prices existent during the year and estimated cost of production was Rs.7.74. This had decreased by 20% in comparison to year 2010..

#### **4.4 Replanting Cost of Tea**

Increase in labour cost for replanting due to labour scarcity and high prices of inputs had specially influenced cultivation costs. It is revealed in calculation that 63% of the total cost is incurred as the cost of labour. (Schedule No. 7-A, 7-B)

**Table 15**  
**Estimated Replanting cost per Hectare 2010/2011 (Rs)-(From Uprooting to Plucking)**

Activity	2010		2011	
	High & Mid	Low	High & Mid	Low
Uprooting (First Year)	372,655	302,935	449,874	363,328
Soil Rehabilitation (Second Year)	110,770	126,629	114,470	122,640
Planting Tea (Third Year)	631,452	619,452	690,152	675,152
First Year Maintenance (Fourth Year)	342,947	334,697	346,982	335,732
Second Year Maintenance (Fifth Year)	246,227	241,577	234,802	228,052
<b>Total</b>	<b>1,704,051</b>	<b>1,625,290</b>	<b>1,836,280</b>	<b>1,724,904</b>

#### 4.5 Rate of Incentive per Hectare and Cultivation Cost

It is apparent from the following table that in considering the ratio between cultivation incentive and cultivation cost existent in year 2011, it had been possible to cover about 14% of the total cultivation cost.

**Table 16**  
**Coat and Incentive Ratios**  
**For Replanting per Hectare (1989 – 2011)**

Year	Cultivation Cost (Rs)		Subsidy Rate		% of Cultivation Cost	
	High/Mid Elevation	Low Elevation	High/Mid Elevation	Low Elevation	High/Mid Elevation	Low Elevation
1989	140684	117490	48000	41000	34%	35%

## 5. Use of Tea Fertilizer

### National Fertilizer Subsidy Scheme

The government decided to grant the national fertilizer subsidy from mid of the year 2006, with the intention to mitigate the undesirable effect on the tea smallholdings sector due to increase in prices of fertilizer mixtures as a result of removal of urea subsidy by the government.

The fertilizer subsidy confined to tea smallholders holding less than 5 acres had been extended to all tea smallholders up to 50 acres in extent from 2008, under “Mahinda Chinthana” fertilizer subsidy scheme.

Accordingly, tea smallholders were able to purchase a 50 Kg bag of recommended tea fertilizer mixtures for tea lands in plucking at a concessionary price of Rs. 1000 during the year 2009 too. The field programme relevant to this was implemented jointly by the Authority and the All Island Federation of Societies. The powers of supervision of sales points and documentation were entrusted to field staff of the Authority including Regional Managers.

From May 2011, the responsibility of recommending fertilizer mixtures under the national fertilizer subsidy was removed from the organization and directed towards buying a bag of fertilizer mixture at a concessionary price of Rs.1300/= from the open market.

Under recommending fertilizer for tea smallholders, 35,436.209 Mt. of fertilizer had been recommended up to May 2011 and the value of that quantity is Rs.1,506.82 million. The total quantity of fertilizer issued in 2010 was 124,142.56 and the value was Rs.4,478.46 million.

**Table No. 17**  
**National Fertilizer Subsidy Scheme – 2010 / 2011**

## 6. Tea Development Project Revolving Fund Loan Scheme

An amount of SDR Million 26.33 had been allocated by the Tea Development Project under a credit agreement signed between the Asian Development Bank and the Sri Lankan government, for implementation for 6 years. An amount of SDR 15.4 million was reserved for development activities in the small holder sector by the Central Bank of Sri Lanka and this credit scheme was due to be implemented from mid of year 2006.

This loan amount consisted Rs.1100 Million and Rs 750 Million was provided for field development activities in the tea small holder sector.

A grace period for loan repayment and facilities of obtaining a 50% interest subsidy not exceeding Rs.hundred thousand per hectare from the cess fund for smallholders who complete tea replanting activities in conformity to technical recommendations within the specified time period is available under this loan scheme.

Requests were made by the participating financing institutions through the Central Bank to obtain the interest subsidies due to loan recipients and it was necessary to obtain inspection reports on field progress of the loan recipients prior to payment of interest subsidy. Accordingly, payment of interest subsidy for loan recipients who qualify for interest subsidy based on the field inspection reports from the regional offices in 2011 was Rs.3.401 million and by the end of the year Rs.3.798 million had been paid as follows.

### Tea Development Project Revolving Fund Loan Interest Subsidy Paid Through Participating Funding Institutions
